The Bamboos of the World Sep 06 2020

Bamboos constitute one of a few select categories of plants which are taxonomically related, very rich in species and of vital economic and ecological importance. Since the early 20th century the accepted number of species of bamboos, world wide, has tripled. However, until now information was scattered through numerous, often not easily available publications. The Bamboos of the World, is the first comprehensive (taxonomic as well as horticultural) reference work that provides basic information on bamboos world wide, whether they are wild or cultivated, well-known or rather unknown. The work, based on bamboo literature, facilitates access to further data by citation and a comprehensive bibliography. Among the main data included are botanical names with synonyms, and geographical distribution of genera and species, varieties with their distinctive characters, common bamboo names, plant introductions to the West, plant size and uses. The distribution of genera is mapped. The

Bamboos of the World presents a wealth of essential information in an accessible and structured manner. It gives the opportunity to check under what names, and where, relevant information on any bamboo can be found. For the researcher with management and development interests it provides a convenient means of basing bamboo resource on a sound understanding of generic and species relationships, with names that appear in earlier literature put into context. The work should prove to be invaluable for those interested in the morphology, taxonomy, distribution and cultivation of bamboos. It should support botanical, forestry, horticultural and ecological research, training and resource management. The Passions of the French Romantics Sep 26 2019

Humorous Wit Apr 25 2022 *Humorous Wit* is a new compilation of quotations in their most humoristic form. There are over 15,000 of these taken from various parts of the world, with over 1,200 of them translated into English for the first time. This book features 5,000 authors from

every corner of the globe, covering a period starting before classical antiquity, when man first started to record his thoughts, to modern times, enriching the cultural heritage. This does not in any way mean that the caveman was less humorous, but the richness of the environment we live in today and the variety of subject matter contribute considerably to a refined sense of humour. Moreover, considering that chimps and other primates also possess the ability to laugh, humour may have been around longer than the human race :)

My Memoirs (1802 to 1833) Oct 20 2021

There is no real biography of Alexandre Dumas. Nobody has collected and sifted all his correspondence, tracked his every movement, and pursued him through newspapers and legal documents. Letters and other papers (if they have been preserved) should be as abundant in the case of Dumas as they are scanty in the case of Molière. But they are left to the dust of unsearched offices; and it is curious that in France so little has been systematically written about her most popular if not her greatest novelist. Many treatises on one or other point in the life and work of Dumas exist, but there is nothing like Boswell's Johnson or Lockhart's Scott. The Mémoires by the novelist himself cover only part of his career, *Les Enfances Dumas*; and they bear the same resemblance to a serious conscientious autobiography as *Vingt Ans Après* bears to Mr. Gardiner's *History of England*. They contain facts, indeed, but facts beheld through the radiant prismatic fancy of the author, who, if he had a good story to tell, dressed it up "with a cocked hat and a sword,"

as was the manner of an earlier novelist. The volumes of travel, and the delightful work on Dumas's domestic menagerie, *Mes Bêtes*, also contain personal confessions, as does the novel, *Ange Pitou*, with the *Causeries*, and other books. Fortunately Dumas wrote most about his early life, and the early life of most people is more interesting than the records of their later years. In its limitation to his years of youth, the *Mémoires* of Dumas resemble that equally delightful book, the long autobiographical fragment by George Sand. Both may contain much *Dichtung* as well as *Wahrheit*: at least we see the youth of the great novelists as they liked to see it themselves. The *Mémoires*, with *Mes Bêtes*, possess this advantage over most of the books, that the most crabbed critic cannot say that Dumas did not write them himself. In these works, certainly, he was unaided by Maquet or any other collaborator. They are all his own, and the essential point of note is that they display all the humour, the goodness of heart, the overflowing joy in life, which make the charm of the novels. Here, unmixed, unadulterated, we have that essence of Dumas with which he transfigured the tame "copy" drawn up by Maquet and others under his direction. He told them where to find their historical materials, he gave them the leading ideas of the plot, told them how to block out the chapters, and then he took these chapters and infused into them his own spirit, the spirit which, in its pure shape, pervades every page of the *Mémoires*. They demonstrate that, while he received mechanical aid from collaborators, took from their hands the dry bones of his romances, it was he who made the dry bones live. He is now d'Artagnan, now Athos, now Gorenflot, now Chicot,—all these and many other personages are mere aspects of the immortal, the creative Alexandre.
