The Literacy Teacher's Playbook, Grades 3-6 Jul 05 2020

This book is about being empowered by assessment, not bogged down by it. -Jennifer Serravallo "The aim of The

Literacy Teacher's Playbook," writes Jennifer Serravallo, "is to help you collect data that is helpful, analyze the data correctly, and make plans based on that data." National and state standards set learning goals, and it's up to you to help each student find his or her path to meeting them. That's why Jen opens up her thinking on assessment in this workshop-in-a-book. Her four-step protocol leads you toward goal-directed instruction: collect the data that will be the most useful to you analyze the data to understand deeply what kids know and can do synthesize data from multiple assessments to create learning goals develop instructional plans and follow-ups to monitor progress. "What you can pull out of a student's messy desk is actually data," Jen writes. So she provides downloadable assessment packets from real students representing two puzzling types of learners. Spread Joana's packet out and let Jen model her protocol. Next try a guided practice with Alex's work. Then you'll be ready to try it with your own students. Trust The Literacy Teacher's Playbook to discover that assessment isn't about numbers and letters. It's about relying on an assessment procedure that helps you know each and every one of your students, so you can teach with confidence and make a difference. Beta Mathematics Workbook Jan 11 2021 This new edition of the BETA MATHEMATICS HOMEWORK BOOK now

contains even more of the questions and activities for which David Barton is famous: well graded, interesting, and linked throughout to real-world applications. The exercises in the Workbook are matched to corresponding exercises in BETA MATHEMATICS 2E, (ISBN 9781741038842) making it easy for teachers to choose, and students to do, homework, extra practice and revision that matches what is done in class. As with BETA MATHEMATICS 2E, the contents of this Workbook are organised into the three Strands of Level 5 (Years 9 and 10) Mathematics in the New Zealand Curriculum, and the examples and exercises follow the spirit of the Numeracy Project. The BETA MATHEMATICS WORKBOOK is organised so that each two page sheet can be removed from the book and handed in for assessment. More room has been provided within questions, for students to demonstrate their mathematical skills. Computers provide mathematicians, engineers, accountants and many other professionals with instant feedback in their explorations of number patterns and relationships. The BETA MATHEMATICS CD in this Workbook features PowerPoint® worked examples, data sets, spreadsheets and LiveMath™ computer algebra activities to give students practice with this vital aspect of maths. It also gives links to many internet sites that explain and illustrate mathematical concepts in detail.

Power and Society in the GDR, 1961-1979 Nov 28 2019

The Berlin Wall, for many people, epitomizes the communist German Democratic Republic, founded in 1949 in the Soviet-occupied zone of post-war Germany; other central features of life in the GDR appear to be under the threat of repression by Soviet tanks and surveillance by the secret security police, the Stasi. But is repression and surveillance really all there is to the GDRs history? How did people come to terms with their situation and make new lives behind the Wall? When the social history of the GDR in the 1960s and 1970s is explored, new patterns become evident. In a period characterised by consumer socialism, international recognition and dtente, a fragile stability emerged. Increased participation in the micro-structures of power, and conformity to the unwritten rules of an increasingly predictable system, suggest accommodation to dominant norms and conceptions. Contributors explore the ways in which lower-level functionaries and people at the grass roots contributed to the formation and transformation of the GDR from industry and agriculture, through popular sport and cultural life, to the passage of generations and varieties of social experience. The volume thus presents a more complex approach to the history of East Germany during its previously under-researched middle decades and sheds new light on the phenomenon of nostalgic memories since unification. And through the framework of the theoretical

concept of normalisation, the book situates the history of the GDR within the wider context of post-war western and eastern European history.

Understanding Texts and Readers Sep 06 2020

"Understanding Texts & Readers makes comprehension make sense. In it, Jennifer Serravallo narrows the distance between assessment and instruction. She maps the four fiction and four nonfiction comprehension goals she presented in The Reading Strategies Book to fourteen text levels and shares sample responses that show what to expect from readers at each. Jen begins by untangling the many

threads of comprehension: Levels, engagement, stamina, the relevance of texts, and much more. Then level by level she: - calls out with precision how plot and setting, character, vocabulary and figurative language, and themes and ideas change as fiction across levels - specifies how the complexity of main idea, key details, vocabulary, and text features increases in nonfiction texts - points out what to expect from a reader as text characteristics change - provides samples of student responses to texts at each level - shares progressions across levels to support instructional planning"--
