Transnational Commercial Law:

International Instruments and

Commentary Jun 25 2019

Transnational commercial law represents the outcome of work undertaken to harmonize national laws affecting domestic and cross-border transactions and is upheld by a diverse spectrum of instruments. Now in its second edition, this authoritative work brings together the major instruments in this field, dividing them into thirteen groups: Treaty Law, Contracts, Electronic Commerce, International Sales, Agency and Distribution, International Credit Transfers and Bank Payment Undertakings, International Secured Transactions, Cross-Border Insolvency, Securities Custody, Clearing and Settlement and Securities Collateral, Conflict of Laws, Civil Procedure, Commercial Arbitration, and a new section on Carriage of Goods. Each group of instruments is preceded by linking text which provides important context by identifying the key instruments in each group, discussing their purposes and relationships, and explaining the major provisions of each instrument, thus setting them in their commercial context. This volume is unique in providing the full text of international conventions, including the preamble - which is important for interpretation

- and the final clauses and any annexes. In addition, each instrument is accompanied by a complete list of dates of signature and ratification by all contracting states, all easily navigated through the detailed tables of contents which precedes it. This fully-indexed work provides an indispensable guide for the practitioner or academic to the primary transnational commercial law instruments.

Liability for Products in a Global Economy Jun 05 2020 This year's volume of the Comparative Law Yearbook of International Business deals with the subject of product liability law. This is a growing area in which manufacturers and suppliers are finding themselves more and more responsible for the quality of their products and for the consequences flowing from any defect therein. This book discusses a wide variety of topics which come under the umbrella of product liability, ranging from liability for injuries caused by the use of asbestos and other toxic substances to the responsibility of air carriers in hijack situations. There is a growing amount of litigation throughout the world tackling the problems arising from the safety of products. These laws take into account the manufacturing process, the transportation, storage and delivery of goods, the intended use of products, their fitness for such purpose, and any warnings or instructions as to use given to consumers and end users. This publication also

covers the question of jurisdiction in product-related litigation, particularly in crossborder transactions. In many instances, a plaintiff will attempt to bring his action in the United States due to the large amount of damages, especially punitive damages, awarded there by juries in civil actions. Defendants, on the other hand, seek to counter this by raising issues such as forum non conveniens. There also is the question of state versus federal jurisdiction within the United States, as well as a discussion focusing on the possible growth of federalism within the European Union and its impact upon product liability nationally and at a European level. A comparison of the divergent cultural attitudes towards property in China and the United States, including the different emphases placed upon the ownership and role of property in society, demonstrates the different views of product liability. Another aspect of defective goods dealt with here is liability for the recall of a dangerous product. There is a chain of responsibility stretching from the manufacturer, through various levels of suppliers, to the final retailer of goods, which is obviously important when attempting to remove dangerous products from the market as quickly as possible before they can cause widespread injury to consumers. This has been shown to be particularly relevant in cases involving automobiles and food products. Overall, therefore, product liability law is a vital part of the general law protecting consumers, both on a national and international basis, which makes

this book a very interesting and useful read for anyone involved in this area.
