Mobile Lenses on Learning Jan 18 2022 This book explores mobile learning as a form of learning particularly suited to our ever more mobile world, presenting a new conceptualisation of the value of mobile devices in education through the metaphor of lenses on learning. With a principal focus on mobile-assisted language learning (MALL), it draws on insights derived from MALL language, literacy and cultural projects to illustrate the possibilities inherent in all mobile learning. In its broad sweep the book takes in new and emerging technologies and tools from robots to holograms, virtual reality to augmented reality, and smart glasses to embeddable chips, considering their potential impact on education and, indeed, on human society and the planet as a whole. While not shying away from discussing the risks, it demonstrates that, handled appropriately, mobile, context-aware technologies allow educators to build on the personalised and collaborative learning facilitated by web 2.0 and social media, but simultaneously to go much further in promoting authentic learning experiences grounded in real-world encounters. In this way, teachers can better prepare students to face a global, mobile future, with all of its evolving possibilities and challenges.

Building Bridges Feb 07 2021 Literacy learning continues to be central to schooling, and is currently of major concern to educators, policy developers, and members of the public alike. However, the proliferation of communication channels in this digital era requires a fundamental re-thinking of the nature of literacy and the pedagogy of literacy teaching and teacher education. This text brings together papers by experts in teacher education, literacy, and information technology to help chart a way forward in this complex area. Because of their background in teacher education, the authors are realistic about what is appropriate and feasible – they do not just jump on a technology bandwagon – but they are also able to provide extended examples of how to embed technology in the practice of teacher education. " Taking a multi-disciplinary perspective (literacy, teacher education and digital technology) and informed by a range of empirical studies, policy analyses and scholarly reflection, this book makes a unique contribution to the literature on one of education's most pressing challenges: how we prepare teachers of literacy at a time when understandings of literacy are expanding. Chapters by leading researchers are complemented by those offering illuminating vignettes of practice that, in turn, provide opportunities for interrogation by the rich theoretical toolkit that characterizes the field. The book is thoughtfully structured and manages a coherence that is rare in edited collections. An impressive and heartening read." – Viv Ellis, Professor of Education at Brunel University, England and Bergen University College in Norway

Smashing Strategic Business Management: How to Pass the ACA SBM Examination 2017 Aug 13 2021 Smashing SBM is based around the same approach as our successful and best-selling Cracking Case book: practical, student-focused and simple advice on what to do to pass this unusual examination. This new 2017 edition has been fully updated for the new syllabus and the learning points raised by the 2016 examinations. Given the relatively low number of questions in SBM (just 2) and the very open nature of the requirements, it is vital that you have a way of determining which areas are important and which issues are going to attract fewer marks. Smashing SBM sets out an effective planning methodology (which we call MAPs) which helps you identify the mark allocation and spend your time effectively. Our MAPs give direction to your answer by providing reminders on how to assess the likely mark allocation whilst also reminding you of key things to do in Q1 and Q2, based on our review of examiner comments. Smashing SBM also contains detailed reviews of the 6 real examination papers set to date with a view to understanding patterns in the question format and content, as well as the mark allocation. Smashing SBM includes detailed revision of key financial management and business strategy topics, as assessed in the real examination papers and ICAEW SBM mock exams. We have also included selected questions from our Business Strategy and Financial Management Q&A books to help you revise these areas very quickly. The book also contains detailed notes on the Specialist Audit & Assurance topics which are examinable at the Advanced Level. Our revision notes focus on areas other than statutory audit as we know that around 10% of the marks will be for these specialised areas such as internal audit, agreed upon procedures, review of prospective information and so on. Smashing SBM contains detailed revision of ethics, including various ethical frameworks, to help you achieve the 5-10% of marks available for ethics in SBM. Smashing SBM is designed to pair up with its sister publication, SBM Exam Room Notes 2017 which provides clear, alphabetically-referenced sets of notes on all key SBM topics to provide exam room reminders of mark-scoring points - perfect for avoiding exam room panic! Be a Graduate Oct 03 2020 Never a straight-A student. Rejected from the teacher's training college. A dropout from law school. No money but a big dream, the author ultimately graduated with an honors degree and then a master's degree, and finally a doctorate. Why do college students drop out? One of the ten reasons is " Students who fail actually lack the will to persist because they have little or no career interest. They have no knowledge of employers' demands. The parents want them to study a course they don't like. Consequently, they don't have any idea of why they are in college." Furthermore, college dropouts and youth's suicides are increasing globally. On top of the common reasons for failing the exams, does the Covid-19 lockdown cause more challenges to you as a student? This book shows you precisely how to study without burning out, and what to do to maintain a healthy body and positive mindset. Being ambitious, she lived and learned the hard way which eventually raced to her finishing line in higher education. Inspired by her own achievement, the author aspires to share her formula of success, so you too can confidently be a graduate!
