Mechanical Excavation in Mining and Civil Industries Sep 07 2020 The secret to streamlined scheduling of mining and civil engineering projects is a solid understanding of the basic concepts of rock cutting mechanics. Comparing theoretical values with experimental and real-world results, Mechanical Excavation in Mining and Civil Industries thoroughly explains various rock cutting theories developed for chisel, conical, disc, and button cutters. The authors provide numerical examples on the effect of independent variables on dependent variables, as well as numerical and solved examples from real-life mining and civil engineering projects using equipment such as: Hard- and soft-ground tunnel boring machines (TBMs) Roadheaders Shearers Ploughs Chain saws Raise borers Impact hammers Large-diameter drill rigs Microtunnel boring machines This book assists students and practicing engineers in selecting the most appropriate machinery for a specific job and predicting machine performance to ensure efficient extraction, and offers background information on rock cutting mechanics and different mechanical miners.

Bobcat Fifty Years Aug 31 2022 Marking the 50th anniversary of an icon of American industry, this book celebrates a half-century of Bobcat with brilliant images of these quintessentially American machines at work, including historical photographs and diagrams, alongside the full story of the only compact machines that have ever mattered. Often imitated but never equaled, the Bobcat skid-steer loader was born when some hardy souls in the Northern Plains needed a new way to get work done. The pictures in these pages show how the Bobcat loader has been moving American industry ever since, joined over the years by Bobcat excavators and trenchers, utility trucks and more. Bobcat Fifty Years chronicles the changes and innovations that have kept the company at the forefront of the nation's compact machinery makers--from the invention of the Bob-Tach quick-change attachment system to the introduction of the Big Bob, the Mini-Bob, and the M-700, the first hydrostatic loader of its size. Here, again and again, is evidence of why Fortune Magazine named the Bobcat one of "America's best"--one of the 100 American-made products that represent the best of their kind, anywhere in the world.

Ripple Effect Dec 31 2019 "Outstanding . . . one of the best books I have read." —Beechclose, five stars A long-ago illicit relationship continues to upend lives in this taut psychological suspense novel . . . Fifteen years ago, teenage Erin had an affair with her teacher that led to tragedy and changed Erin's life. Today,

she's a married woman who keeps to herself and stays close to home, still scarred by the experience. When she's attacked while running in the park, Erin doesn't tell her husband—but she does confide in Nick, the man who came to her rescue. Then letters start to arrive, making references to her past and leaving her even more unnerved. When a neighbour reports that someone's been watching her house, Erin's world starts to crumble. Erin has worked hard to distance herself from her past. But her life may be in mortal danger, and as she's plunged back into trauma, she might finally learn the truth about what really happened all those years ago . . .

Cruising Galicia Jun 16 2021 This new title covers the extensive cruising area of Galicia in the north west of Spain from Ribadeo to Bayona, where the beautiful rias provide shelter from the Atlantic in picturesque harbours and remote anchorages. The authors have spent several seasons cruising in the area and making use of their local connections have produced a modern guide that provides in-depth information necessary for yachts spending time visiting the rias and ports of Galicia. Annotated town plans covering over 90 destinations show shore-side facilities and recommended restaurants and side panels provide advice on interesting places to visit, local customs and features of interest. Carlos Rojas has sailed yachts since 2000, a short but intensive career during which he has crossed the Atlantic, cruised in the Pacific, made several passages across Biscay and sailed to Ireland and France. His professional involvement in technology companies as an engineer, manager and director has given him an insight into design and usability that he applies to his pilot books. Carlos has lived most of his life in Britain but he is originally from Spain, a country that he knows well, naming Galicia as one of his favourite areas. Robert Bailey was brought up in a sailing family. Over a period of 35 years, and with the aid of a Nicholson 32 and Rustler 36, much of the coastline of the north western approaches to Europe, from the Faroe Islands in the north to the Morbihan in the south, were avidly explored. In 2001 he adopted a more flexible approach to his career as an aerospace engineer and this allowed him to take up cruising instruction. He is now a Yachtmaster Instructor.

Концепция повышения эффективности универсальных малогабаритных погрузчиков Jun 28 2022 Рассмотрены возможности и ограничения повышения эффективности универсальных малогабаритных погрузчиков с бортовым поворотом путем совершенствования конструктивной схемы и оптимизации параметров подсистем привода. Представлен новый метод обоснования параметров, принимаемых к оптимизации, базирующийся на априорной и апостериорной информации. Даны критерии оценки эффективности и комплексной оптимизации параметров машин на ранних стадиях проектирования. На основе физико-математического моделирования и статистического анализа значений конструктивных и эксплуатационных параметров машин показаны перспективы дальнейшего развития конструкций и технологических схем работы данного класса машин со сменными рабочими органами. Приведена методика и результаты экспериментальных исследований параметров динамического нагружения машины. Предназначена для научных и инженерно-технических работников, а также студентов, магистрантов и аспирантов направления подготовки 190100 «Наземные транспортно-технологические машины и комплексы».

Desert Puma Jul 18 2021 Scientists and conservationists are beginning to understand the importance of top carnivores to the health and integrity of fully functioning ecosystems. As burgeoning human populations continue to impinge on natural landscapes, the need for understanding carnivore populations and how we affect them is becoming increasingly acute. Desert Puma represents one of the most detailed assessments ever produced of the biology and ecology of a top carnivore. The husband-and-wife team of Kenneth Logan

and Linda Sweanor set forth extensive data gathered from their ten-year field study of pumas in the Chihuahua Desert of New Mexico, also drawing on other reliable scientific data gathered throughout the puma's geographic range. Chapters examine: the evolutionary and modern history of pumas, their taxonomy, and physical description a detailed description and history of the study area in the Chihuahua Desert field techniques that were used in the research puma population dynamics and life history strategies the implications of puma behavior and social organization the relationships of pumas and their preyThe authors provide important new information about both the biology of pumas and their evolutionary ecology -- not only what pumas do, but why they do it. Logan and Sweanor explain how an understanding of puma evolutionary ecology can, and must, inform long-term conservation strategies. They end the book with their

ideas regarding strategies for puma management and conservation, along with a consideration of the future of pumas and humans. Desert Puma makes a significant and original contribution to the science not only of pumas in desert ecosystems but of the role of top predators in all environments. It is an essential contribution to the bookshelf of any wildlife biologist or conservationist involved in large-scale land management or wildlife management.
