It Takes a Village Idiot Jan 30 2020 Finalist for the 2001 Thurber Prize for American Humor a Rocky Mountain News (Denver) Best Book of the Year Millions of people dream of abandoning the city routine for a simple country life. Jim Mullen was not one of them. He loved his Manhattan existence: parties, openings, movie screenings. He could walk to hundreds of restaurants, waste entire afternoons at the Film Forum, people-watch from his window. Then, one day, calamity. His wife quits smoking and buys a weekend house in the Catskill Mountains of upstate New York -- in a tiny town diametrically opposed to Manhattan in every way. Slowly, however, the man who once boasted, "Life is just a cab away," begins to warm to the place -- manure and compost and strangers who wave and all -- and to embrace the kind of life that once gave him the shakes.

Neither Village Nor City Jan 24 2022 This book attempts a comprehensive overview of the "architecture" of the kibbutz: its essence, its history, its constant change, and its physical planning and architectural expression and management, and relates to this unique spatial alternative from a holistic viewpoint: the kibbutz in all stages of its development, from the kvutza as a "micro-utopian" commune to its physical configuration as an autonomous-autarkic complex arising out of its basic social, economic and educational structure, and its later stages as a potential 'macro-utopian' regional entity, envisioning a real alternative lifestyle to the capitalist metropolis. It is about its beginning and also about its end... and what might perhaps be its new future...

Factory Girls Nov 02 2022 An eye-opening and previously untold story, *Factory Girls* is the first look into the everyday lives of the migrant factory population in China. China has 130 million migrant workers—the largest migration in human history. In *Factory Girls*, Leslie T. Chang, a former correspondent for the Wall Street Journal in Beijing, tells the story of these workers primarily through the lives of two young women, whom she follows over the course of three years as they attempt to rise from the assembly lines of Dongguan, an industrial city in China's Pearl River Delta. As she tracks their lives, Chang paints a never-before-seen picture of migrant life—a world where nearly everyone is under thirty; where you can lose your boyfriend and your friends with the loss of a mobile phone; where a few computer or English lessons can catapult you into a completely different social class. Chang takes us inside a sneaker factory so large that it has its own hospital, movie theater, and fire department; to posh karaoke bars that are fronts for prostitution; to makeshift English classes where students shave their heads in monklike devotion and sit day after day in front of machines watching English words flash by; and back to a farming village for the Chinese New Year, revealing the poverty and idleness of rural life that drive young girls to leave home in the first place. Throughout this riveting portrait, Chang also interweaves the story of her own family's migrations, within China and to the West, providing historical and personal frames of reference for her investigation. A book of global significance that provides new insight into China, *Factory Girls* demonstrates how the mass movement from rural villages to cities is remaking individual lives and transforming Chinese society, much as immigration to America's shores remade our own country a century ago.

Sunland and Tujunga Mar 02 2020 The beautiful village of Sunland began as a quiet agricultural center, while Tujunga, at first a utopian colony, chiefly embraced commercial, social, and cultural endeavors. The two once exquisite spots have prospered and united, evolving into a hub of small business trade, close community, and diversified living. The Tujunga Native Americans originally settled this piece of secluded wilderness alongside Southern California's Angeles National Forest. However, it was not until Spanish settlement and missionization in 1769, and the Mexican occupation soon after, that the Sunland

and Tujunga area was transformed from a primitive village to a Mexican cattle frontier, facilitated by the Rancho Tujunga land grant of 1840. As the region grew and changed, the soul of Sunland and Tujunga became personified in the hardiness, innovation, success, and failure of each generation of pioneers. Chronicling the region's history from the year 500 to modern times, Sunland and Tujunga: From Village to City tells the singular story of the development of these California towns from quiet native home to inconspicuous village to thriving city. Exploring the growth of industry, agriculture, and recreation in Sunland and Tujunga, this volume also depicts the daily life of early inhabitants who built homes, erected churches, set up schools, opened businesses, and worked hard to establish a strong, healthy community for the generations that would follow. Over 100 compelling photographs highlight the awesome beauty of the area, as well as the unyielding spirit of the men and women who shaped Sunland and Tujunga into the communities they are today.

Jane Jacobs's First City Nov 29 2019 A thorough investigation of how Jane Jacobs's ideas about the life and economy of great cities grew from her home city, Scranton Jane Jacobs's First City vividly reveals how this influential thinker and writer's classic works germinated in the once vibrant, mid-size city of Scranton, Pennsylvania, where Jane spent her initial eighteen years. In the 1920s and 1930s, Scranton was a place of enormous diversity and opportunity. Small businesses of all kinds abounded and flourished, quality public education was available to and supported by all, and even recent immigrants could save enough to buy a house. Opposing political parties joined forces to tackle problems, and citizens worked together for the public good. Through interviews with contemporary Scrantonians and research of historic newspapers, city directories, and vital records, author Glenna Lang has uncovered Scranton as young Jane experienced it and shows us the lasting impact of her growing up in this thriving and accessible environment. Readers can follow the development of Jane's acute observational abilities from childhood through her passion in early adulthood to understand and write about what she saw. Reflecting Jane's belief in trusting one's own direct observation above all, this volume has been richly illustrated with historic and modern color images that help bring alive a lost Scranton. The book demonstrates why, at the end of Jacobs's life, her thoughts and conversations increasingly returned to Scranton and the potential for cohesion and inclusiveness in all cities.

Chatham Village May 04 2020 Chatham Village, located in the heart of Pittsburgh, is an urban oasis that combines Georgian colonial revival architecture with generous greenspaces, recreation facilities, surrounding woodlands, and many other elements that make living there a unique experience. Founded in 1932, it has gained international recognition as an outstanding example of the American Garden City planning movement and was named a National Historic Landmark in 2005. Chatham Village was the brainchild of Charles F. Lewis, then director of the Buhl Foundation, a Pittsburgh-based charitable trust. Lewis sought an alternative to the substandard housing that plagued low-income families in the city. He hired the New York-based team of Clarence S. Stein and Henry Wright, followers of Ebenezer Howard's utopian Garden City movement, which sought to combine the best of urban and suburban living environments by connecting individuals to each other and to nature. Angelique Bamberg provides the first book-length study of Chatham Village, in which she establishes its historical significance to urban planning and reveals the complex development process, social significance, and breakthrough construction and landscaping techniques that shaped this idyllic community. She also relates the design of Chatham Village to the work of other pioneers in urban planning, including Frederick Law Olmsted Sr., landscape architect John Nolen, and the Regional Planning Association of America, and considers the different ways that Chatham Village and the later New Urbanist movement address a common set of issues. Above all, Bamberg finds that Chatham Village's continued viability and vibrance confirms its distinction as a model for planned housing and urban-based community living.

From Village to City Sep 07 2020 "Between 1988 and 2013, the Chinese city of Zouping transformed from an impoverished village of 30,000 people to a bustling city of over 300,000, complete with factories, high rises, parks, shopping malls, and all the infrastructure of a wealthy East Asian city. From Village to City paints a vivid portrait of the rapid change of Zouping, its environs, and the lives of the once-rural people who live there. Despite its modernization and higher standards of living, Zouping is far from a utopia; its inhabitants face new challenges and problems such as alienation, class formation and exclusion,

patriarchy, and pollution. To understand this transformation, Andrew B. Kipnis has developed a theory of urbanization, demonstrated in his compelling portrayal of an emerging metropolis and the hopes, fears, joys, and sorrows of the people who call it home"--Provided by publisher.

From Prehistoric Villages to Cities Sep 27 2019 Archaeologists have focused a great deal of attention on explaining the evolution of village societies and the transition to a 'Neolithic' way of life. Considerable interest has also concentrated on urbanism and the rise of the earliest cities. Between these two landmarks in human cultural development lies a critical stage in social and political evolution. Throughout world, at various points in time, people living in small, dispersed village communities have come together into larger and more complex social formations. These community aggregates were, essentially, middle-range; situated between the earliest villages and emergent chiefdoms and states. This volume explores the social processes involved in the creation and maintenance of aggregated communities and how they brought about revolutionary transformations that affected virtually every aspect of a society and its culture. While there have been a number of studies that address coalescence from a regional perspective, less is understood about how aggregated communities functioned internally. The key premise explored in this volume is that large-scale, long-term cultural transformations were ultimately enacted in the context of daily practices, interactions, and what might be otherwise considered the mundane aspects of everyday life. How did these processes play out "on the ground" in diverse and historically contingent settings? What are the strategies and mechanisms that people adopt in order to facilitate living in larger social formations? What changes in social relations occur when people come together? This volume employs a broadly cross-cultural approach to interrogating these questions, employing case studies which span four continents and more than 10,000 years of human history.

City Comforts Aug 31 2022 The book shows examples of small things -- City Comforts -- that make urban life pleasant: places where people can meet, methods to tame cars and to make buildings good neighbors, art that infuses personality into locations and makes them into places. Many of these small details are so obvious as to be invisible.

Village in the City Dec 11 2020 The 'village in the city' (ViC) is actually a peculiar and particular Chinese phenomenon. This book examines what happens to the villages in the Chinese maelstrom of development.

Towns, Ecology, and the Land May 28 2022 Towns and villages are sometimes viewed as minor, even quaint, spots, whereas this book boldly reconceptualizes these places as important dynamic environmental 'hotspots'. Multitudes of towns and villages with nearly half the world's population characterize perhaps half the global land surface. The book's pages feature ecological patterns, processes, and change, as well as human dimensions, both within towns and in strong connections and effects on surrounding agricultural land, forest land, and arid land. Towns, small to large, and villages are examined with spatial and cultural lenses. Ecological dimensions - water, soil and air systems, together with habitats, plants, wildlife and biodiversity - are highlighted. A concluding section presents concepts for making better towns and better land. From a pioneer in both landscape ecology and urban ecology, this highly international town ecology book opens an important frontier for researchers, students, professors, and professionals including environmental, town, and conservation planners.

“The Lost Village,” since she was a little girl. In 1959, her grandmother’s entire family disappeared in this mysterious tragedy, and ever since, the unanswered questions surrounding the only two people who were left—a woman stoned to death in the town center and an abandoned newborn—have plagued her. She’s gathered a small crew of friends in the remote village to make a film about what really happened. But there will be no turning back. Not long after they’ve set up camp, mysterious things begin to happen. Equipment is destroyed. People go missing. As doubt breeds fear and their very minds begin to crack, one thing becomes startlingly clear to Alice: They are not alone. They’re looking for the truth... But what if it finds them first? Tent City Urbanism Aug 26 2019 Tent City Urbanism explores the intersection of the "tiny house movement" and tent cities organized by the homeless to present an accessible and sustainable housing paradigm that can improve the quality of life for everyone. While tent cities tend to evoke either sympathy or disgust, the author finds such informal settlements actually address many of the shortfalls of more formal responses to homelessness. Tent cities often exemplify self-management, direct democracy, tolerance, mutual aid, and resourceful strategies for living with less. This book presents a vision for how cities can constructively build upon these positive dynamics rather than continuing to seek evictions and pay the high costs of policing homelessness. The tiny house village provides a path forward to transitional and affordable housing within the grasp of a local community. It offers a bottom-up approach to the provision of shelter that is economically, socially, and environmentally sustainable—both for the individual and the city. The concept was first pioneered by Portland's Dignity Village, and has since been re-imagined by Eugene's Opportunity Village and Olympia's Quixote Village. Now this innovative model has emerged from the Northwest to inspire projects in Madison, Austin, and Ithaca, and is being pursued by advocacy groups throughout the country. Along with documenting and articulating the roots of this budding movement, the book provides a practical guide to help catalyze new and existing initiatives in other areas.

The End of the Village Nov 09 2020 How China's expansive new era of urbanization threatens to undermine the foundations of rural life Since the beginning of the twenty-first century, China has vastly expanded its urbanization processes in an effort to reduce the inequalities between urban and rural areas. Centered on the mountainous region of Chongqing, which serves as an experimental site for the country's new urban development policies, *The End of the Village* analyzes the radical expansion of urbanization and its consequences for China's villagers. It reveals a fundamental rewriting of the nation's social contract, as villages that once organized rural life and guaranteed rural livelihoods are replaced by an increasingly urbanized landscape dominated by state institutions. Throughout this comprehensive study of China's "urban-rural coordination" policy, Nick R. Smith traces the diminishing autonomy of the country's rural populations and their subordination to larger urban networks and shared administrative structures. Outside Chongqing's urban centers, competing forces are at work in reshaping the social, political, and spatial organization of its villages. While municipal planners and policy makers seek to extend state power structures beyond the boundaries of the city, village leaders and inhabitants try to maintain control over their communities' uncertain futures through strategies such as collectivization, shareholding, real estate development, and migration. As China seeks to rectify the development crises of previous decades through rapid urban growth, such drastic transformations threaten to displace existing ways of life for more than 600 million residents. Offering an unprecedented look at the country's contentious shift in urban planning and policy, *The End of the Village* exposes the precarious future of rural life in China and suggests a critical reappraisal of how we think about urbanization.

The Shenzhen Phenomenon Sep 19 2021 The Shenzhen Phenomenon is a comprehensive and systematic study about how Shenzhen, the world's fastest growing city, has developed into an international metropolis from scratch within 40 years. It unravels the decision and policy making, planning, design, and development processes that have enabled the city's rapid growth, and associated problems and paradoxes. It also reveals the politics and power that have propelled this experimental city to spearhead Deng Xiaoping's 'reform and opening-up' agenda, which has made the city and remade the nation. This book demystifies several long-held misperceptions through identifying Shenzhen's rise as an opportunity deriving from a crisis, as a product of both grassroots ingenuity and top vision, and as both a planned city and an unplanned city. Produced on the 40th anniversary of Shenzhen, this timely volume not only offers a comprehensive and systematic chronicle of the city, but also opens a window to understand China's new city making and urbanisation. It will be of interest to academics, students and practitioners in the field of urban and Chinese studies, as well as urban planning and design.

China in One Village Aug 07 2020 A global future in the history of a single village After a decade away from her ancestral family village, during which she became a writer and literary scholar in Beijing, Liang Hong started visiting her rural hometown in landlocked Henan Province. What she found was an extended family riven by the seismic changes in Chinese society and a village turned inside out by emigration, neglect, and environmental despoliation. Combining family memoir, literary observation, and social commentary, Liang's by turns lyrically poetic and movingly raw investigation into the fate of her village became a bestselling book in China and brought her fame. For many months, Liang walked the roads and fields of her village, recording the stories of her relatives—especially her irascible, unforgettable father—and talking to everyone from high government officials to the lowest of village outcasts. Across China, many saw in Liang's riveting interviews with family members and childhood acquaintances a mirror of their own lives, and her observations about the

way the greatest rural-to-urban migration of modern times has twisted the country resonated deeply. China in One Village tells the story of contemporary China through one clear-eyed, literary observer, one family, and one village.

Between Village and City Oct 09 2020 The rural-urban linkages in the Hyderabad region are one of the research areas of Work Package 6 "Participation and Communication Strategies" of the project which is dealt with by the nexus Institute for Cooperation Management and Interdisciplinary Research. Nexus examines the quality of rural-urban linkages with the aim to identify the exchange between city and village and establish or strengthen spatial partnerships that can promote energy efficient lifestyles and have a positive effect on social networks. Within this research field the present paper tries to analyse rural-urban migration in this area with focus on changes through new technologies in the city as well as in the villages.

From Urban Village to East Village Apr 02 2020 This landmark study explores a new reality in today's inner cities - one that diverges radically from the dominant models of either the urban village, with its shared culture, or the disorganized zone of urban anomie. Growing numbers of inner city neighbourhoods now contain populations drawn from a multiplicity of ethnicities, subcultures, and classes. These groups may share physical space, but they pursue disparate ways of life and hold very different views of their neighbourhood's future. Such areas have become contested turf - arenas of heated political struggle. Nowhere has this struggle been so complexly joined than in the East Village on New York's Lower East Side. For over two decades, established and new immigrants, community activists, hippies, squatters, yuppies, developers, drug dealers, artists, the homeless, and the police have been battling for control of the district and its central meeting ground, Tompkins Square Park. Based on five years of research and participant observation, this book gives a vivid account of the contestants and their struggles in the battle for the Lower East Side. It is a battle which is likely to be replicated, perhaps less violently, in many other parts of urban America.
