Basic Nursing Aug 31 2022 Building on the strengths of the fourth edition, Basic Nursing: Essentials for Practice is back in a new edition! Thoroughly updated and revised to provide a more focused and engaging presentation, this new edition offers the basic principles, concepts, and skills needed by nursing students. The five-step nursing process returns to provide a consistent, logical organizational framework, with a clear writing style and numerous learning aids. An increased emphasis on caring, along with new boxes on Focused Client Assessment and Outcome Evaluation, reflect current practice trends. This new edition is better than ever! Five-Step Nursing Process provides a consistent organizational framework. More than 40 nursing skills are presented in a clear, 2-column format with rationales for all steps. Procedural Guidelines boxes provide streamlined step-by-step instructions for performing basic skills. Growth and Development chapter and age-related considerations throughout clinical chapters help prepare students to care for clients of all ages. Sample Nursing Care Plans highlight defining characteristics in assessment data, include client goals and expected outcomes in the planning section, and provide rationales for each nursing intervention. Progressive Case Studies follow the interactions of a client and nurse throughout the chapter to illustrate steps in the nursing process and develop critical thinking skills. Brief coverage of higher level concepts including research, theory, professional roles, and management, maintains the text's focus on essential, basic content. The narrative style makes the text more engaging and appealing. Focused Client Assessment boxes provide specific guidelines for factors to assess, questions and approaches, and physical assessment. Content on delegation is discussed throughout the narrative and specific guidelines are included for each skill. Skills now include Unexpected Outcomes and Interventions to alert for potential undesirable responses and provide appropriate nursing actions. Caring in Nursing is presented in a new chapter and as a thread throughout the text. Outcome Evaluation are based on the chapter's case study and provide guidelines on how to ask questions and evaluate care based on the answers received. NIC and NOC are discussed in the Nursing Process chapter to provide an overview of these taxonomies encountered in practice. NCLEX-style multiple-choice questions at the end of each chapter help students evaluate learning.

Methodologies and Intelligent Systems for Technology Enhanced Learning, 9th International Conference, Workshops 2020 This book is based on the 9th International Conference in Methodologies and Intelligent Systems for Technology Enhanced Learning, which was hosted by the University of Salamanca and held in Ávila (Spain) from 26th to 28th June 2019. Expanding on the topics of the evidence-based TEL workshops series, it provides an open forum for discussing intelligent technologies for learning. In particular, it discusses recommendation mechanisms that enable us to tailor learning to different contexts and people, e.g., by considering their personality; and learning analytics that help augment learning opportunities, e.g., by supporting the adaptation of the learning material. In addition to technologies, it covers methods from different fields, such as educational psychology or medicine, and from diverse communities co-working with people, such as making communities and participatory design communities to help create novel TEL opportunities. Further it describes the use of methods and technologies to investigate and enhance learning for "fragile users", like children, the elderly and those with special needs. We thank the sponsors: IEEE Systems Man and Cybernetics Society Spain Section Chapter and the IEEE Spain Section (Technical Co-Sponsor), IBM, Indra, Viewnext, Global exchange, AEPIA, APPIA and AIR institute.

The Future of Nursing Jun 04 2020 The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Organized around the nursing process, the text helps readers understand the overall theory and rationales for each skill and technique. Coverage of evidence-based care, cultural/religious considerations, nursing management, and community-based nursing is provided throughout. Extensive case studies, critical-thinking features, NCLEX-style review questions, and new QSEN activities give students practice applying their knowledge and clinical reasoning. Easily adaptable to any conceptual curriculum model, Clinical Nursing Skills is the definitive resource for best practice nursing standards, guidelines, and competencies.

Caring Science, Mindful Practice Oct 28 2019 "Caring Science, Mindful Practice offers unique and practical project examples that nurses will consider for their practice or educational settings. With its integration of Watson's caring science and mindfulness principles, Sitzman and Watson have extended knowledge of Watson's caring science and caritas processes through integrating Thich Nhat Hahn's mindfulness perspective and practices. The book offers rich examples of nursing projects that may broaden nursing care for greater patient and student satisfaction and assist nurses with holistic self-care." -- Gale Robinson-Smith, PhD, RN is Associate Professor, College of Nursing, Villanova University, International Journal for Human Caring "This book provides wonderful tools for nurses to use in practice, education, or even for self-care. Designed for any nurse, new or experienced, who wishes to learn more about applying Jean Watson's Human Caring Theory to practice, it supplies the meaning behind the importance of having a practice based on mindfulness....[It] is a practical, easy-to-read book for all nursing audiences and could be used at any educational level."--Doody's Medical Reviews iSitzman and Watson's book is an invaluable resource. The strength of this book is its simplicity on one level yet its complexity as the reader works throughout the layers incorporated within the book.--Nursing Times This is the first text to help students and practicing nurses translate and integrate the philosophy and abstracts of Caring theory into everyday practice. It was developed for use as the primary text for an online caring theory course that will be offered through the Watson Caring Science Institute in October 2013. Through case examples and guiding activities, the book helps students and practitioners to more fully comprehend the meaning and use of each Caritas Process. It draws upon the contemplative and mindfulness teaching of Thich Nhat Hahn, a renowned Buddhist monk, poet, author, teacher, and peace activist. Each of the ten Caritas Processes are clearly presented by the author and accompanied by guided mindfulness and artistic practices to support learning and absorption of the method. These artistic practices include the use of images, art, metaphors, and expressive symbols that are designed to promote meaningful introspection and self-awareness—the underpinnings of genuine Caritas practice. The book reflects several years of teaching by the author, who has been invited by several large health care institutions (including Kaiser-Permanente) to provide training based on her materials. Key Features: Helps students and practitioners to integrate the philosophy and abstracts of Caring theory into clinical practice Offers case studies and guided activities to reinforce content Draws upon the contemplative and mindfulness teachings of Thich Nhat Hahn Includes concrete guided mindfulness and artistic practices for each of the ten Caritas Processes Designed for a wide audience including undergraduate, graduate and international nursing students
