It's everywhere, and it's telling entire generations of people how to travel the world.' – Fairfax Media (Australia)

How to Astronaut May 30 2022 A wildly entertaining account of the rules, lessons, procedures, and experiences of space travel, How to Astronaut is a book that will appeal to anyone— male or female, young or old—with even a passing interest in space. Written by Col. Terry Virts, a former astronaut, space shuttle pilot, and International Space Station commander who spent 200 consecutive days in space, it answers all of our curious questions and much more: Here's how to survive that first brush with weightlessness (in the so-called vomit comet); the nearly indescribable thrill of a first blastoff; managing the daily tasks—eating, bathing, doing chores, going to the bathroom— that are anything but ordinary when you're orbiting the earth at 17,000 miles per hour; how to don your space suit and head out to work on a spacewalk (“alone in the vacuum”); how to prepare for emergencies of all kinds, from managing “space brain” to dealing with a dead crew member; and what it's like to return to Earth, including something as seemingly simple as walking after spending six months in zero-g. A born storyteller, Virts reveals the often-untold side of space travel in 51 short chapters filled with a mix of you-are-there detail, a dose of science made simple, and the inherent drama of describing something few will ever know firsthand.

The Universe Jun 30 2022 The world's first and only guide to the Universe The follow-up to our best-selling The World has been developed with NASA and is the world's first and only guide to the Universe. We explore in detail the planets within our solar system and inform readers of their distance from Earth, temperature and atmosphere, before featuring recently discovered stars, galaxies and planets millions of light years away.* Written in the style of The World, packed with essential information and vital statistics*

Fascinating and engaging, with content provided by NASA, the world's foremost space authority* A must-own book for anyone interested in outer space and space travel

Environmental Science (First Edition) Feb 01 2020 "A User's Guide for Planet Earth" focuses on the fundamental components of Earth's environmental systems, their interactions, and the way society affects and is affected by alterations in climate, ecosystems, hydrology, and the many other factors that determine our environment. Rather than attempting to include an overwhelming series of

environmental anecdotes and peripheral information, this text distills the essential concepts involved in environmental science into a readily understandable and easily digestible form. This will keep students and their professors up to date with the latest understanding of the processes that maintain environmental goods and services, that drive alterations in the earth system, and that control the ways that the environment behaves as an integrated system at all scales. Students will explore the role of scientific insight in environmental science, and how emerging ideas make it possible to solve problems rooted in the past. "A User's Guide for Planet Earth" is written for introductory Environmental Science courses, with college freshmen in mind. The material is closely aligned with course content, and the clear, concise style of the text is designed to give students an excellent understanding of important concepts. Webinar Professor Sahagian discusses his teaching philosophy with David Blockstein, Senior Scientist with the National Council for Science and the Environment (NCSE) and Executive Secretary of the Council of Environmental Deans and Directors (CEDD). Watch the webinar. Professor Sahagian is an internationally recognized Earth and environmental scientist and shared Nobel Peace Prize winner. He earned his B.S. in Physics at Rensselaer Polytechnic Institute, his M.S. in Geosciences at Rutgers, and his Ph.D. in Geophysics from the University of Chicago. He served as a NORDA Oceanographer at Dartmouth College; an Associate Research Scientist at Lamont-Doherty, Columbia University; and a Research Scientist at the Byrd Polar Research Center, Ohio State University. He was the Executive Director of The Global Analysis, Integration, and Modeling Task Force of the International Geosphere Biosphere Program at the Institute for the Study of Earth, Oceans, and Space at the University of New Hampshire before moving to Lehigh University to direct the Environmental Initiative, as well as develop and teach the introductory course in Environmental Science. Part of his research led him to coauthor the pivotal reports of the Intergovernmental Panel on Climate Change (IPCC), which was jointly awarded the 2007 Nobel Peace Prize with former vice president Al Gore. Professor Sahagian's areas of research include paleoclimatology, volcanology, global change, stratigraphy, geo-dynamics and tectonics, global hydrology, and sea level.

A Kid's Guide to Saving the Planet May 06 2020 The Earth is warming. The climate is changing. Sea levels are on the rise, and plastic is showing up... everywhere. We have every reason to be concerned about our planet, our only home. New inventions and technologies will help, but cleaning up the planet--saving the world--will require all of us to pay attention and take action. What can you do to help? Plenty! Despite what you may hear on the news, the situation isn't hopeless, and we aren't helpless. In this inspiring, informative book, nationally recognized meteorologist Paul Douglas clearly and thoughtfully presents the daunting problems of climate change. And he offers realistic solutions (including some that are already working!) and actions that kids can participate in now. It's

imperative that we all step up and become part of the solution, by engaging in new, smarter ways of living.

Lonely Planet's Guide to Life Apr 28 2022 This book collects together cultural pearls of wisdom from 86 countries to form the ultimate reference book for how to live well. Each culture lives by its own words of wisdom - handed down from generation to generation, covering everything from keeping a house tidy as a Shinto shrine to cooking a meal as simple and nutritious as a southern Italian's supper. Do you want to eat as well as the French, enjoy life as much as the Costa Ricans, live as thoughtfully as the Scandinavians and be as healthy as the Japanese? This 416-page book, packed full of expertly-sourced information and stunning photography, will tell you how. With countries as far and wide reaching as Colombia and New Zealand, you'll be sure to learn plenty of life lessons that you can put into action throughout.

Ad Astra: An Illustrated Guide to Leaving the Planet Sep 02 2022 'I could have done with a copy of Ad Astra in December 2015!' –Tim Peake 'A wonderful, wise and witty guide for space explorers everywhere.' – Richard Osman 'A must read both for intrepid space explorers and misty-eyed dreamers. Now, to space!' – Hannah Fry 'Few people are more knowledgeable, celebratory and witty about space travel than Dallas Campbell.' – Adam Rutherford Need some space? For almost all human history we've been firmly rooted to the Earth. And, sure, it's got some good things going for it: nice views, friendly inhabitants, good coffee. Air. But what if you want to get off? Whether you've got itchy feet and need a bit of a break, or you're looking for a complete change of scene, this book has all the information you'll need to leave, with FREE expert advice from the men and woman who can actually make it happen. Do I need a passport? How do I know if I have the right stuff? Can I take my dog? What spacesuit do I need? Where am I going to go? What am I going to eat? As well as being a deeply impractical guide to getting off the planet, this is an eclectic and beautifully illustrated mix-tape of space travel stories – both real and imagined. From the migrating lunar geese that flew us to the moon in the 1600's, to Elon Musk's wild plan to get humans to Mars en masse in the future; from the history of early rocket science to the Soviet tortoises that secretly won the space race. A collection for anyone who has looked up in wonder at the stars... And then wondered how to get there. 'The next best thing to actually heading off into space.' – Jim Al-Khalili 'Few people are more knowledgeable, celebratory and witty about space travel than Dallas Campbell.' – Adam Rutherford 'If, like me, you dream of going into space, this is definitely the place to start the journey.' – Dan Snow 'A must have volume for astronauts and armchair astronauts alike.' – Helen Sharman OBE 'Funny, factual and beautiful.' – Shaun Keavney 'Read it, make notes, and be ready when the day comes.' – Helen Czerski

The Green Book Apr 04 2020 Ellen DeGeneres, Robert Redford, Will Ferrell, Jennifer Aniston, Faith Hill, Tim McGraw, Martha

Stewart, Tyra Banks, Dale Earnhardt, Jr., Tiki Barber, Owen Wilson, and Justin Timberlake tell you how they make a difference to the environment. Inside *The Green Book*, find out how you can too: - Don't ask for ATM receipts. If everyone in the United States refused their receipts, it would save a roll of paper more than two billion feet long, or enough to circle the equator fifteen times! - Turn off the tap while you brush your teeth. You'll conserve up to five gallons of water per day. Throughout the entire United States, the daily savings could add up to more water than is consumed every day in all of New York City. - Get a voice-mail service for your home phone. If all answering machines in U.S. homes were replaced by voice-mail services, the annual energy savings would total nearly two billion kilowatt hours. The resulting reduction in air pollution would be equivalent to removing 250,000 cars from the road for a year! With wit and authority, authors Elizabeth Rogers and Thomas Kostigen provide hundreds of solutions for all areas of your life, pinpointing the smallest changes that have the biggest impact on the health of our precious planet.

Apocalyptic Planet Aug 01 2022 2013 Orion Book Award Winner 2013 Sigurd F. Olson Nature Writing Award Winner Ours is not a stable planet. It is prone to sudden, violent natural disasters and extremes of climate. In this exhilarating exploration of our globe, Craig Childs goes to where the apocalypse can be seen now. From the driest deserts of Chile, through the genetic wasteland of central Iowa, to the site of the drowned land bridge of the Bering Sea, he uncovers cataclysms that tell us what could be next: forthcoming ice ages, super volcanoes, and the conclusion of planetary life cycles. Childs delivers a sensual feast in his descriptions of the natural world, and undeniable science that reveals both the earth's strengths and frailties. Bearing witness to the planet's sweeping and perilous changes, he shows how we can alter the future, and how the world will live on, though humans may not survive to see it.

Our Not-So-Lonely Planet Travel Guide, Volume 1, Volume 1 Jul 08 2020 Super serious Asahi Suzumura and laidback, easygoing Mitsuki Sayama might seem like an odd couple, but they made a deal; they'll vacation around the world and when they get back to Japan, they'll get married. We Rise Nov 23 2021 Challenge the status quo, change the face of activism, and confront climate change head on with the ultimate blueprint for taking action. Xiuhtezcatl Martinez is a 16-year-old climate activist, hip-hop artist, and powerful new voice on the front lines of a global youth-led movement. He and his group the Earth Guardians believe that today's youth will play an important role in shaping our future. They know that the choices made right now will have a lasting impact on the world of tomorrow, and people-- young and old--are asking themselves what they can do to ensure a positive, just, and sustainable future. *We Rise* tells these stories and addresses the solutions. Beginning with the empowering story of the Earth Guardians and how Xiuhtezcatl has become a voice for his generation, *We Rise* explores many aspects of effective activism and provides step-by-step information on how to start and join solution-oriented movements. With conversations between Xiuhtezcatl and well-known activists, revolutionaries, and celebrities, practical advice for living a more sustainable lifestyle, and ideas and tools for building resilient communities, *We Rise* is an action guide on how to face the biggest problems of today, including climate change, fossil fuel extraction, and industrial agriculture. If you are interested in creating real and tangible change, *We Rise* will give you the inspiration and information you need to do your part in making the world a better place and leave you asking, what kind of legacy do I want to leave?

Sassy Planet Mar 16 2021 Check out what's up and coming in LGBTQ scenes around the world with this quirky, vibrant queer travel guide. For decades, LGBTQ travelers have congregated in predictable places: queer-friendly cities like New York and Berlin, or beach towns such as Mykonos and Fire Island. But as progress and visibility expand across the globe, so do queer people's travel options. Drawing on their own extensive travel experiences, as well as the perspectives of local DJs, artists, activists, drag performers, DIY historians, and long-time residents (many of them found through the biggest advantage gay travelers have over their straight counterparts: 'hookup' apps like Grindr and Scruff), the authors of Sassy Planet offer up the latest on what's hot in 40 cities around the world. Traveling in the US? Check out RuPaul's Drag Race star Alaska's recommendations for Pittsburgh, where she first got her start. Planning a trip to Japan? Read about the 300+ queer bars packed into Tokyo's Shinjuku neighborhood. Even in countries where homosexuality is sanctioned, you'll read about emerging pockets of queer acceptance and culture. You'll also find the very latest info on where to go in major destinations, from the Por Detroit parties in Mexico City to new Brooklyn hot spots. The book features interviews with local celebs, best-of lists, and little-known hideaways all packaged with helpful insights, cool bits of regional culture, queer lore—and of course, plenty of sass to spare.

The Complete Guide to Space Exploration Mar 28 2022 To infinity and beyond! This out-of-the-world adventure takes young explorers on a voyage of discovery across the universe. Planet Earth Sep 29 2019 The result, Planet Earth: A Beginner's Guide, is an expedition into the origins, evolution, and workings of our home planet in which John Gribbin does what he does best: takes 4.5 billion years of geological history and digs out the essential bits, from the physics of Newton and the geology of Wegener to the environmentalism of Lovelock. Along the journey, he uses stories from history and more current events to bring the science to a human level. Gribbin's introductory guidebook — very much a first step into geology and geography for the uninitiated — is filled with his lively voice and unique view, as he takes on the subject of the Earth from an astronomer's perspective.

Lonely Planet Buenos Aires Aug 09 2020
