Eyes In The Sky Apr 13 2021 The fascinating history and unnerving future of high-tech aerial surveillance, from its secret military origins to its growing use on American citizens Eyes in the Sky is the authoritative account of how the Pentagon secretly developed a godlike surveillance system for monitoring America's enemies overseas, and how it is now being used to watch us in our own backyards. Whereas a regular aerial camera can only capture a small patch of ground at any given time, this system—and its most powerful iteration, Gorgon Stare—allow operators to track thousands of moving targets at once, both forwards and backwards in time, across whole city-sized areas. When fused with big-data analysis techniques, this network can be used to watch everything simultaneously, and perhaps even predict attacks before they happen. In battle, Gorgon Stare and other systems like it have saved countless lives, but when this technology is deployed over American cities—as it already has been, extensively and largely in secret—it has the potential to become the most nightmarishly powerful visual surveillance system ever built. While it may well solve serious crimes and even help ease the traffic along your morning commute, it could also enable far more sinister and dangerous intrusions into our lives. This is closed-circuit television on steroids. Facebook in the heavens. Drawing on extensive access within the Pentagon and in the companies and government labs that developed these devices, Eyes in the Sky reveals how a top-secret team of mad scientists brought Gorgon Stare into existence, how it has come to pose an unprecedented threat to our privacy and freedom, and how we might still capitalize on its great promise while avoiding its many perils.

This is young Isaac Asimov's first novel, full of wonders and ideas, the book that launched the novels of the Galactic Empire, culminating in the *Foundation* series. The Sound the Stars Make Rushing Through the Sky Sep 26 2019 Introducing a dramatic new chapter to American Indian literary history, this book brings to the public for the first time the complete writings of the first known American Indian literary writer, Jane Johnston Schoolcraft (her English name) or Bamewawagezhikaquay (her Ojibwe name), *Woman of the Sound the Stars Make Rushing Through the Sky* (1800-1842). Beginning as early as 1815, Schoolcraft wrote poems and traditional stories while also translating songs and other Ojibwe texts into English. Her stories were published in adapted, unattributed versions by her husband, Henry Rowe Schoolcraft, a founding figure in American anthropology and folklore, and they became a key source for Longfellow's sensationally popular *The Song of Hiawatha*. As this volume shows, what little has been known about Schoolcraft's writing and life only scratches the surface of her legacy. Most of the works have been edited from manuscripts and appear in print here for the first time. *The Sound the Stars Make Rushing Through the Sky* presents a collection of all Schoolcraft's extant writings along with a cultural and biographical history. Robert Dale Parker's deeply researched account places her writings in relation to American Indian and American literary history and the history of anthropology, offering the story of Schoolcraft, her world, and her fascinating family as reinterpreted through her newly uncovered writing. This book makes available a startling new episode in the history of American culture and literature.

The Only Plane in the Sky Oct 08 2020 NEW YORK TIMES BESTSELLER “This is history at its most immediate and moving..A marvelous and memorable book.” —Jon Meacham “Remarkable..A priceless civic gift..On page after page, a reader will encounter words that startle, or make him angry, or heartbroken.” —The Wall Street Journal “Visceral...I repeatedly cried..This book captures the emotions and unspooling horror of the day.” —NPR “Had me turning each page with my heart in my throat..There ’s been a lot written about 9/11, but nothing like this. I urge you to read it.” —Katie Couric The first comprehensive oral history of September 11, 2001—a panoramic narrative woven from the voices of Americans on the front lines of an unprecedented national trauma. Over the past eighteen years, monumental literature has been published about 9/11, from Lawrence Wright ’s *The Looming Tower*, which traced the rise of al-Qaeda, to The 9/11 Commission Report, the government ’s definitive factual retrospective of the attacks. But one perspective has been missing up to this point—a 360-degree account of the day told through the voices of the people who experienced it. Now, in *The Only Plane in the Sky*, award-winning journalist and bestselling historian Garrett Graff tells the story of the day as it was lived—in the words of those who lived it. Drawing on never-before-published transcripts, recently declassified documents, original interviews, and oral histories from nearly five hundred government officials, first responders, witnesses, survivors, friends, and family members, Graff paints the most vivid and human portrait of the September 11 attacks yet. Beginning in the predawn hours of airports in the Northeast, we meet the ticket agents who unknowingly usher terrorists onto their flights, and the flight attendants inside the hijacked planes. In New York City, first responders confront a scene of unimaginable horror at the Twin Towers. From a secret bunker underneath the White House, officials watch for incoming planes on radar. Aboard the small number of unarmed fighter jets in the air, pilots make a pact to fly into a hijacked airliner if necessary to bring it down. In the skies above Pennsylvania, civilians aboard United Flight 93 make the ultimate sacrifice in their place. Then, as the day moves forward and flights are grounded nationwide, Air Force One circles the country alone, its passengers isolated and afraid. More than simply a collection of eyewitness testimonies, *The Only Plane in the Sky* is the historic narrative of how ordinary people grappled with extraordinary events in real time: the father and son working in the North Tower, caught on different ends of the impact zone; the firefighter searching for his wife who works at the World Trade Center; the operator of in-flight telephone calls who promises to share a passenger ’s last words with his family; the beloved

FDNY chaplain who bravely performs last rites for the dying, losing his own life when the Towers collapse; and the generals at the Pentagon who break down and weep when they are barred from rushing into the burning building to try to rescue their colleagues. At once a powerful tribute to the courage of everyday Americans and an essential addition to the literature of 9/11, *The Only Plane in the Sky* weaves together the unforgettable personal experiences of the men and women who found themselves caught at the center of an unprecedented human drama. The result is a unique, profound, and searing exploration of humanity on a day that changed the course of history, and all of our lives.

Half the Sky May 03 2020 #1 NATIONAL BESTSELLER • A passionate call to arms against our era's most pervasive human rights violation—the oppression of women and girls in the developing world. From the bestselling authors of *Tightrope*, two of our most fiercely moral voices With Pulitzer Prize winners Nicholas D. Kristof and Sheryl WuDunn as our guides, we undertake an odyssey through Africa and Asia to meet the extraordinary women struggling there, among them a Cambodian teenager sold into sex slavery and an Ethiopian woman who suffered devastating injuries in childbirth. Drawing on the breadth of their combined reporting experience, Kristof and WuDunn depict our world with anger, sadness, clarity, and, ultimately, hope. They show how a little help can transform the lives of women and girls abroad. That Cambodian girl eventually escaped from her brothel and, with assistance from an aid group, built a thriving retail business that supports her family. The Ethiopian woman had her injuries repaired and in time became a surgeon. A Zimbabwean mother of five, counseled to return to school, earned her doctorate and became an expert on AIDS. Through these stories, Kristof and WuDunn help us see that the key to economic progress lies in unleashing women's potential. They make clear how so many people have helped to do just that, and how we can each do our part. Throughout much

of the world, the greatest unexploited economic resource is the female half of the population. Countries such as China have prospered precisely because they emancipated women and brought them into the formal economy. Unleashing that process globally is not only the right thing to do; it's also the best strategy for fighting poverty. Deeply felt, pragmatic, and inspirational, *Half the Sky* is essential reading for every global citizen.

The Beatles and the Race to the Moon were the DNA of the 1960s: Two adventurous threads continuously intertwined from 1960 to 1970. *Into the Sky* is a scholarly book masquerading as fast-moving historical fiction. From Flurry of Notes: "One of the best books I read last year was *Into the Sky with Diamonds*" [RG] has written a book that everyone with a love for the Beatles, the Race to the Moon, or the '60s must read. It's detailed but not boring, familiar but not stale. [RG] breathes new life and perspective to an entire decade in a joyful and enlightening way, and sheds new light and insight into a time that shook the world. I guarantee you'll wish both the book and the Beatles never stopped." From Amazon: I totally enjoyed reading this book. I highly recommend it for both people who were around to experience the events that occurred in the 60's and for the younger generation who will enjoy learning about an era of history that has had a huge impact. This is one of the most fascinating books I have read in over 20 years! A House in the Sky Aug 18 2021 BREAKING NEWS: Amanda Lindhout 's lead kidnapper, Ali Omar Ader, has been caught. Amanda Lindhout wrote about her fifteen month abduction in Somalia in A House in the Sky. It is the New York Times bestselling memoir of a woman whose curiosity led her to the world 's most remote places and then into captivity: "Exquisitely told..A young woman 's harrowing coming-of-age story and an extraordinary narrative of forgiveness and spiritual triumph" (The New York Times Book Review). As a child, Amanda Lindhout escaped a violent household by paging through issues of National Geographic and imagining herself visiting its exotic locales. At the age of nineteen, working as a cocktail waitress, she began saving her tips so she could travel the globe. Aspiring to understand the world and live a significant life, she backpacked through Latin

America, Laos, Bangladesh, and India, and emboldened by each adventure, went on to Sudan, Syria, and Pakistan. In war-ridden Afghanistan and Iraq she carved out a fledgling career as a television reporter. And then, in August 2008, she traveled to Somalia—"the most dangerous place on earth." On her fourth day, she was abducted by a group of masked men along a dusty road. Held hostage for 460 days, Amanda survives on memory—every lush detail of the world she experienced in her life before captivity—and on strategy, fortitude, and hope. When she is most desperate, she visits a house in the sky, high above the woman kept in chains, in the dark. Vivid and suspenseful, as artfully written as the finest novel, *A House in the Sky* is "a searingly unsentimental account. Ultimately it is compassion—for her naïve younger self, for her kidnappers—that becomes the key to Lindhout's survival" (O, The Oprah Magazine).
