**The Culling** Sep 07 2020 Carl Sims, a young virologist, discovers a plot hatched by a group of

international scientists to cull, in a matter of weeks, two-thirds of the world's population - some 4.5 billion people, by releasing a deadly virus that kills two-thirds of those it infects. Their goal is to reduce Earth's population from an unsustainable seven billion to two billion. What is he to do? Try to stop the conspiracy, or join it? Horrific, yes, but what if this culling could prevent the extinction of some forty percent of our planet's flora and fauna? Or if he was certain it was the only way to prevent an even larger human die-off, incurring significantly more suffering, by the end of this century? Or if he were convinced it represented the only hope for humanity surviving at all? This is at the heart of this thriller, for these viruses do, in fact, exist. Most everything that plagues mankind today - the highest concentration of atmospheric CO2 in 3 million years, escalating extinction rates, habitat loss, fishery collapses, climate change, polar and glacial ice thaws, arable land loss, desertification, aquifer depletions, ocean acidification, unprecedented air pollution, looming famine and social unrest - stems from over consumption which, unchecked, will lead to Earth's sixth mass extinction event. "Robert Johnson's first novel tackles an issue that most in the media, the arts, and entertainment industry--even the environmental community--are afraid to discuss directly: overpopulation. Despite the potential for despair or preachy diatribes, the gravity of the issues is woven into the story with plenty of colorful characters, gallows humor and a suspenseful plot that unravels across continents, making for an entertaining and thought-provoking debut." --New York Journal of Books "This is so real, it is frightening, although the characters are fictional, the story is possible--and very likely. The book will keep you awake nights, thinking about our vulnerability, and worried that we've already gone too far for the planet to survive without a culling." --Pulp Den "Johnson's debut thriller could be more science fact than science fiction. There's a scheme afoot by rogue scientists to release a virulent flu virus and kill two-thirds of Earth's population, a

megalomaniacal plot to save the planet from becoming a lifeless rock due to climate change and overpopulation. A scary premise. Get a flu shot. Wash your hands regularly." --Kirkus

**The Unwinding of the Miracle** Apr 02 2020 "Born blind in Vietnam, Julie Yip-Williams narrowly escaped euthanasia by her grandmother, only to then flee the political upheaval of the late 1970s with her family. Loaded into a rickety boat with three hundred other refugees, Julie made it to Hong Kong and, ultimately, America, where a surgeon at UCLA gave her partial sight. Against all odds, she became a Harvard-educated lawyer, with a husband, a family, a life. Then, at age thirty-seven, with two little girls at home, Julie was diagnosed with terminal metastatic colon cancer, and a different journey began. The Unwinding of the Miracle is the story of a vigorous life refracted through the prism of imminent death. Motherhood, marriage, ambition, love, wanderlust, tennis, grief, jealousy, anger, comfort, pain, disease--there is simply nothing this book is not about. Growing out of a blog Julie has kept through the past four years of her life (undertaken because she couldn't find the guidance she needed through her disease), this is the story of a life lived so well, and cut too short. It is inspiring and instructive, delightful and shattering. It is a book of indelible moments, seared deep. With glorious humor, beautiful and bracing honesty, and the cleansing power of well-deployed anger, Julie Yip-Williams has set the stage for her lasting legacy and one final miracle: the story of her life"--

Because maybe, just maybe, she's started to have feelings for someone else . . . Someone who is definitely not available. This is going to be the worst Christmas break ever . . . or is it?
