The Lantern's Ember Nov 04

2022 A bold and ghostly stand-alone from New York Times bestselling author Colleen Houck, with all the moodiness of *Sleepy Hollow* and all the romance her fans love.

Welcome to a world where nightmarish creatures reign supreme. Five hundred years ago, Jack made a deal with the devil. It's difficult for him to remember much about his mortal days. So he focuses on fulfilling his sentence as a Lantern--one of the watchmen who guard the portals to the Otherworld, a realm crawling with every nightmarish creature imaginable. Jack has spent centuries jumping from town to town, ensuring that nary a mortal--or not-so-mortal-soul slips past him. That is, until he meets beautiful Ember O'Dare. Seventeen, stubborn, and a natural-born witch,

Ember feels a strong pull to the Otherworld. Undeterred by Jack's warnings, she crosses into the forbidden plane with the help of a mysterious and debonair vampire--and the chase through a dazzling, dangerous world is on. Jack must do everything in his power to get Ember back where she belongs before both the earthly and unearthly worlds descend into chaos.

Colleen Houck, the New York Times bestselling author of the *Tiger's Curse* series and the *Reawakened* series, breathes new life into classic folklore in this wild, twisting adventure propelled by the spirit of Halloween. "[Houck] offers a fresh spin on *The Legend of Sleepy Hollow*." --Kirkus Reviews "A wild and seductive adventure. . . . A must-have for YA collections." --SLJ "The *Lantern's Ember* has something for everyone. From

A manifesto for a radically different philosophy and practice of manufacture and environmentalism "Reduce, reuse, recycle" urge environmentalists; in other words, do more with less in order to minimize damage. But as this provocative, visionary book argues, this approach perpetuates a one-way, "cradle to grave" manufacturing model that dates to the Industrial Revolution and casts off as much as 90 percent of the materials it uses as waste, much of it toxic. Why not challenge the notion that human industry must inevitably damage the natural world? In fact, why not take nature itself as our model? A tree produces thousands of blossoms in order to create another tree, yet we do not consider its abundance wasteful but safe, beautiful, and highly effective; hence, "waste equals food" is the first principle the book sets forth.

Products might be designed so that, after their useful life, they provide nourishment for something new-either as "biological nutrients" that safely re-enter the environment or as "technical nutrients" that circulate within closed-loop industrial cycles, without being "downcycled" into low-grade uses (as most "recyclables" now are). Elaborating their principles from experience (re)designing everything from carpeting to corporate campuses, William McDonough and Michael Braungart make an exciting and viable case for change.

book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Pocket Idiot's Guide to Piano Chords Aug 09 2020

The piano can be one of the most challenging instruments to play. Many people give up shortly after Mary had a Little Lamb, when they see just how complex piano notation can be to read and how difficult it is to get their hands to do two different things at once (like scratch their head with one and rip the pages of their song book with the other). The

Pocket Idiot's Guide to Piano Chords takes the intimidation out of learning to play the piano and gives readers a quick and easy method to playing the songs they love. Readers are taught the non-classical method of playing piano and introduced to the basics of keyboard geography, chords, scales, pattern progressions, and reading lead sheets. Readers won't necessarily be able to play Rachmaninov's 3rd Concerto when they're finished, but they'll be well on their way to playing some of the popular songs that got them interested in learning how to play the piano in the first place.

Modern Art - who Cares? Oct 23 2021 The conservation of contemporary art should not be a static process carried out behind closed doors but dynamic and open to discourse. New media and new materials constantly present issues which traditional conservation methods cannot address and a continual search for new techniques is therefore required. This dynamic research may include interviews with artists; documentation of artists' materials; the recording of image, word or sound of performances, installations, temporary and 'permanent' visual art; scientific research into the identification, composition, ageing and preservation of modern materials. This volume makes a most important contribution to the ongoing debate by presenting the conservation challenges relating to ten objects of different media and materials (plastics, kinetic objects, monochromes and works of mixed media) of considerable art-historical

value. The ten selected studies include the works of Jean Tinguley, Piero Manzoni, Tony Cragg and Mario Merz. In addition to case studies, this volume includes symposium papers by art historians, physicists, philosophers, artists, conservators and critics on topics as varied as: accidental damage; working with artists; packing and transport; installation; identifying plastics; ethics, training, databases etc.

The Artist Interview Jan 02 2020 In order to preserve and maintain contemporary artworks, we need authentic, content-related and technical information which we can obtain by interviewing the artists who produced them. The SBMK (Foundation for the Conservation of Contemporary Art) and RCE (Cultural Heritage Agency of the Netherlands) worked together for years to develop guidelines and good practices. In 2012 a book will be published: "The Artist Interview". For conservation and presentation of contemporary art.
